am pulls the 'stage' onto the deck during a training exercise aboard USNS Sioux

(Above) Master Diver Badge, the highest diving accreditation given. Currently two of the MDSU-1 enlisted divers are preparing for that certification.

(Left) IC3(DV) Waren Ross checks the valves on the gas tank before the divers begin diving for the day. Connelly, a diver for Mobile Diving and Salvage Unit One, participated in a day of training aboard the USNS Sioux (T-ATF-171) recently. It can take divers several hours to prepare for one day of diving.

(Below) Members of MDSU-1 work together to prepare IC3(DV) Waren Ross (left) and BM2(SW/DV) Irving Conley (right) for a deep sea dive while training off the coast of Pearl Harbor recently.

EN1(DV) Gregory J. Lee monitors the CO₂ and O₂ levels and communicates with divers in the recompression chamber during a recent training exercise aboard USNS Sioux (T-ATF-171).

IC2(DV) Jerrod Barentine, of MDSU-1, exits the recompression chamber aboard the USNS Sioux (T-ATF-171) after returning from a deep sea dive for training.
